Github: https://github.com/neelakshisamanta322-maker
Mobile: +91 9332488158

Skills

Languages: Python, C, C++, Java (Basics)
Tools/Platforms: VS Code, MS SQL Server, Dev C++, Blue J
Soft Skills: Problem-Solving, Team Player, Adaptability

Projects

Spin the wheel | *Python 3* — Apr' 25

- Manages user input handling, generates random events, maintains balance, and controls the game-loop logic.
- Enables players to deposit money, place bets, spin the wheel, and receive outcomes based on predefined color-based reward rules.
- Ensures error-free user interaction by validating inputs, preventing invalid bets, and maintaining real-time balance updates. It also supports multiple rounds and allows withdrawals at the end of the session
- Provides the GitHub repository link: https://github.com/neelakshisamanta322-maker/Spin-the-Wheel

Blackjack | *Python 3* — May' 25

- Developed a fully interactive Blackjack game in Python, featuring card dealing, score calculation, hidden dealer cards, and automated game decisions
- Implemented real casino-style Blackjack rules, including Ace handling (1 or 11), natural Blackjack detection, Hit/Stand decisions, and dealer logic following the "must hit until 17" rule.
- Designed custom ASCII-art card displays to enhance the console-based gaming experience.
- Managed dynamic scoring, bust conditions, and game outcomes (win/lose/tie) while ensuring smooth and engaging gameplay.
- Strengthened skills in object-oriented programming, input handling, functional decomposition, and game-state management through practical implementation.
- Provides the GitHub repository link: https://github.com/neelakshisamanta322-maker/Blackjack

Advanced Smart Railway Track Obstacle & Safety Monitoring System | *Arduino Uno / Embedded C++* — April' 26

- Developed a multi-sensor railway safety system for real-time track hazard monitoring.
- Implemented ultrasonic obstacle detection with LCD, buzzer, and LED alerts.
- Integrated IR sensors, soil-moisture, and LM35 sensors for crack, landslide, and overheating detection.
- Developed GSM-based SMS alerts for detected railway hazards.
- Provides the GitHub repository link: https://github.com/neelakshisamanta322-maker/Advanced-Smart-Railway-Track-Obstacle-Safety-Monitoring-System-Arduino-Uno

Certificates

Data Analytics Essentials | *Cisco* — Jan' 26
Python essentials 1| *Cisco* — Feb' 26
Introduction to Artificial Intelligence| *Cisco* — Apr' 26
Introduction to Cyber Security| *Cisco* — *Apr' 26*
Community Development Project | *Times of India* — July'26
Introduction to Data Science| *Infosys Springboard* — *Aug'26*

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology — Aug' 25 – Present
Computer Science and Engineering; CGPA: 7.91

Haldia Govt. Sponsored Vivekananda Vidyabhwan(H.S) — Haldia, West Bengal
Intermediate — Jan'17 – May' 25
Percentage (Secondary): 82.4%
Percentage (Higher Secondary): 75.6%
